React/Redux

Jan 2021 – Feb 2021 Online course
grasshopper.app HTML, CSS, JS

Oct 2002 - Feb 2004 Offline course
Center for Economic Knowledge
"UNPRED" Computer operator:
Repair and adjustment.

Cover Letter

A short story about how I got into front-end development...

In the spring of 2020, due to work, I decided to update the service announcements in the feed. Then I thought, should I make a landing page? And attach an animated link to the ad place! I had some experience with CSS and HTML, back in 2003. During my school years I made up blogs and styles for forums. But there was a desire to do so in step with the times. Here we got acquainted with JS and, accordingly, with the React library. I was surprised how much things have changed and developed over the years. I made a landing page for a second friend and did not have time to notice how it became one of my main hobbies. I have already mastered in practice how to work with the Redux library, rest API methods, hooks, thank, typing...

Now I am studying node JS. I plan to grow into a full-fledged full-stack developer. I am looking for a company that will be interested in my contribution and my development as a specialist. It should be a mutually beneficial exchange. I will be glad to feedback!

Sincerely. Eugene Korobov!
